

Trencon constructed the Iveco Training Centre at Don Bosco Educational Centre in Ennerdale to the value of R1.8 Million at cost with no profit margin. This included erecting the structure, plaster and paintwork, tiling and the electrical installation.

Trencon further sponsored and hosted a fun day for all the primary school children at the Don Bosco Educational Centre with a picnic, face painting, jumping castles, party packs and school stationery.

Iveco runs the TechPro 2 Programme at Don Bosco Educational Centre; which was created to support local communities by training young people and providing them with technical training in the automotive and industrial vehicle sectors.

TechPro2 has created a model for innovative relationships between schools and the professional workforce. Students will rediscover a passion for learning and studying and are then able to put it all into practice.
